

TeamViewer – Schedule Meetings

Would you like to hold meetings with your business partners, customers, or colleagues? We will show you how to schedule and host meetings in just three easy steps.

1 Setting up a meeting

Start your TeamViewer full version, and select the “Meeting” tab. Arrange your meeting by clicking on “Schedule a meeting” and signing in to your TeamViewer account.

For more information on the TeamViewer account please go to “TeamViewer - Use the Computers & Contacts List”

2 Creating a meeting

Create a meeting by clicking on “New meeting ...”. Then, pass on the details (start time, Meeting ID, password (if applicable), conference call number, and PIN) by e-mail or phone.

Easily manage meetings you have created in “My Meetings”.

3 Holding a meeting

You may start a scheduled meeting by selecting a meeting in the window “My Meetings” and clicking on “Start”. Your participants can join the meeting by clicking on the link in the invitation e-mail or by logging on to <https://go.teamviewer.com>. An application will run, and they will immediately see your desktop.
